Hannah's book *Birth, A Conscious Choice!* opens a door to the incredible journey from spirit to becoming human, and also addresses the painful issues of loss and guilt that sometimes become a reality for parents who have lost a child. Through her own experience of three very different pregnancies, she brings forth very important information that can benefit all human beings regardless of age or gender.

"After reading Hannah's book I was amazed of how much I could use it for my own personal practice. Often in my counseling work the matter of having a child comes up. Sometimes it is a hidden thing in a relationship and there are many integrated challenges around this issue. I have been able to use the tools from this book to unravel these mysteries and help many people come to a positive solution. It is a must read for any couple wanting to have a baby and especially for women. I recommend it to all my clients".
